# FETAL MONITORING SOFTWARE SOLUTIONS

## JPD-300K

300K is a CTG viewing and archiving system combining live reception and viewing of CTG traces from one or more fetal monitors. Full networking capability allows live traces & stored records to be viewed from one or more locations, including remote access for expert referral, consultation.

300K has been designed as a flexible operating platform on which a wide range of system configurations and options can be built. The entry level package provides a CTG focused viewing and archiving system. Fully loaded, it provides a comprehensive networked antenatal & labour management system with links into hospital databases, outputs to national databases and other options, providing a totally integrated service.
